

JAYAHARISAI TOTHALA

Hyderabad, Telangana | 500054 | jayaharisai1212@gmail.com | [LinkedIn](#) | [GitHub](#) | [Website](#)

- 4.5+ years of experience in Software Engineering, backend Development, and AI-driven Product Development.
- Expertise in Python, FastAPI, REST API Development, System Design, LLM Orchestration, AI Model Development, Finetuning, Quantization, MLOps and LLMOps.
- Leading a team of 7 engineers with experience in technical leadership, project management, and scalable solutions delivery.
- Mentor and trained 16+ junior developers in software development, backend engineering, and team collaboration practices.
- Passionate about innovation, rapid learning, problem-solving and building scalable high-performance applications.

SKILLS

Programming Languages: Python, SQL, HTML5, CSS

Backend & Frameworks: FastAPI, Django, Node.js, REST APIs

AI & Generative AI: LangChain, LangGraph, OpenAI, Gemini Integration, AWS Bedrock, Azure AI Foundry, Hugging Face, AI Agents, RAG, Fine-tuning, Quantization

Cloud & DevOps: AWS (EC2, Lambda), Azure, Docker, Kubernetes, Terraform, Jenkins, CI/CD

MLOps & Data Tools: MLflow, DVC, PySpark

Vector Databases: Pinecone, FAISS, ChromaDB, Milvus, Qdrant

Databases & Caching: PostgreSQL, Redis

Tools & Platforms: Git, Azure SDK, System Design, Backend Architecture, LLMOps, MLOps

PROFESSIONAL EXPERIENCE

Cloud Angles / Hyderabad, Telangana - (12/2021) - Present

Software Engineer / AI Backend Engineer

- Designed and developed scalable backend systems and enterprise Generative AI platforms using Python, FastAPI, AWS, and Kubernetes.
- Finetuned and deployed LLaMA 3.3 and Mistral models on AWS EC2 supporting 900+ concurrent AI requests with optimized low-latency performance.

- Built MLOps and LLMOps platforms automating fine-tuning, quantization, RAG pipelines, AI agents, and governance workflows for AI Engineers and Data Engineers.
- Led backend architecture, system design, database management, deployment automation, and scalable REST API development for enterprise applications.
- Developed AI-powered enterprise tools including HR Query Bot, Developer Debugging Assistant, Meeting Notes Automation, and Jira Retrieval Systems.
- Implemented advanced AI workflows using LangChain, LangGraph, RAG, and multi-technique model fine-tuning for production-grade AI solutions.
- Mentored and trained 13+ junior developers on backend engineering, scalable systems, MLOps practices, and Generative AI development.

Prent - Innovation Engineer / Agentic AI

- Developing enterprise AI agents and intelligent automation platforms using Azure AI Foundry, LangChain, LangGraph, Azure SDK, and Bedrock.
- Automated AI Foundry agent development using code-driven workflows to improve versioning, configuration management, observability, and behavioral tracing of AI agents.

EDUCATION

Master of Technology (M.Tech) — Data Science & Artificial Intelligence - Indian Institute of Technology Patna (*Pursuing*)

Bachelor of Technology (B.Tech) - Institute of Aeronautical Engineering — 2021

OTHERS

- Recognized as **Best Developer** for outstanding technical contributions and scalable product development.
- Awarded **Innovation Champion** 3 times for delivering impactful AI and automation solutions.
- Passionate about exploring emerging technologies, rapid learning, and building innovative solutions.
- I enjoy playing badminton, traveling to new places, and listening to music during free time.

DECLARATION

I hereby declare that the information provided above is true and accurate to the best of my knowledge and belief.
